

Join Aerosol Magee Scientific at European Aerosol Conference 2025

August 31 –
September 5

Lecce, Italy

Booth 21 & 22

6 presentations

Monday, September 1

10:15 Dr. Martin Rigler: *Intercomparison Campaign of Total Carbon Analyzers and Aethalometers: TC-BC Equivalence to OC/EC Using CEN/TR 18076* – room 1

15:15 Dr. Asta Gregorič: *Characterisation of aerosol types from different sources using a 2D AAE approach at various European sites* - room 3

16:00 Dr. Matic Ivančič: *Traffic-related black carbon concentration forecast using the dispersion model GRAL* – room 1

16:15 Dr. Bálint Alfody: *Light absorbing and scattering properties of freshly emitted, aged, and secondary formed wood combustion aerosols* - room 3

Tuesday, September 2

Poster Presentation by Dr. Klemen Kunstelj: *A novel approach for the determination of Total Carbon, Organic Carbon, and Elemental Carbon with the Aerosol Magee Scientific Carbonaceous Aerosol Speciation System (CASS)*

Friday, September 5

12:45 Dr. Martin Rigler: *Optimized Source Apportionment Using Total Carbon and Black Carbon Measurements: Integrating Multidimensional BC-Tracer and AAE Model – room 2*
